Hiring Team, iTel Networks
905-1850 Mission Flats Rd
Kamloops, BC
V2C 1A9
Subject: Application for Data Center Technician

Dear iTel Networks Hiring Team,

I am writing to express my interest in the Data Center Technician position in Merritt, BC. As a local resident, I am excited by the opportunity to contribute my foundational IT skills to maintaining the crucial infrastructure that powers iTel's rapid growth, extensive network footprint, and commitment to next-generation projects like the Bell AI Fabric.

My background, which includes my ongoing Bachelor's that is coming to an end, and my hands-on role as a System Analyst for the City of Merritt, provides a strong technical base. In my current position, I actively troubleshoot hardware and software and perform computer setup and deployment. While I am eager to expand my expertise in areas like structured cabling, power distribution, and enterprise-level networking, I believe that my core technical troubleshooting skills will help to quickly learn and excel in those areas.

Although I am mainly proficient in Windows and MacOS, I have some knowledge in Linux from my studies. I am a fast learner, detail-oriented, and ready to master the specific skills needed for data center maintenance. I see this role as a chance to grow professionally, aligning with iTel's support for development.

I look forward to discussing how my motivation and technical background can quickly contribute to your team in Merritt.

Sincerely,

Laura Lefebvre
